

MODEL 255XP

15" Capacity Hand-Fed Chipper

The 15-inch capacity Bandit® 255XP features a powerful dual feed system along with a 15.5-inch by 25-inch chipper throat opening. The Model 255XP has no problem **pulling and devouring** large limbs and trees quickly and efficiently. Combined with an array of engine options, solid structural design, and an **abundance of features and options** to enhance productivity, this machine offers a lifetime of getting big jobs done with assuredness.

BOOST YOUR CAPABILITY

While 12" capacity chippers are very popular, owning a 15" capacity Model 255XP moves you into the next level in terms of capability, extending your territory to include larger and heavier limbs. Tree companies will enjoy the extra confidence to process more challenging material and to leave jobsites quicker and cleaner than others.

STAY HUNGRY

It's no secret that Bandit is known throughout the industry for its most powerful feed systems. The Model 255XP is proof with its dual 10-5/8" diameter x 24-1/2" wide horizontal feed rollers arranged in Bandit's unique slide box feed system. The powerful 32.3 CID hydraulic motors can pull entire whole trees while the standard hydraulic lift cylinder can crush stubborn, forked branches all day long and keep operator fatigue to a minimum by eliminating excess trimming.

MAXIMIZE YOUR UPTIME

The most common maintenance items are easy to access on Bandit chippers. Bolt-in knives are easy to access and change through the chipper hood. And all service areas are easy to access, including all grease points, so daily maintenance is simple and quick.

SOLID GEOMETRY

Heavy-duty components help ensure long life and trouble-free operation, even when chipping tough materials. The chipper disc, housing and shaft are built rugged so that they should never need to be replaced. Material is fed and chipped at 45-degree angle to the disc, where it can be thrown with enormous velocity from a sturdy, smooth, curved, and adjustable discharge. Position it all on a solid chassis with steel-welded construction and you will have a chipper that promises significant return on investment for years to come.

Green

Frame: Mainframe is constructed with 1/4" x 2" x 6" rectangular tubing with a 3/8" x 3" x 6" tubular tongue

COMMITTED TO QUALITY & PRODUCTIVITY

Since 1983, Bandit has manufactured equipment for a multitude of wood waste processing markets. The vision since the beginning, is to build quality, highly productive, easy to maintain equipment providing years of dependable service.

The commitment for quality, innovation and dedication is instilled in every employee and is one of the main reasons why Bandit became an Employee-Owned Company (ESOP) in 2018. These core values ensure each Bandit machine will leave the factory ready to exceed your expectations.

MODEL 255XP FEATURES

- **Hydraulic Lift Cylinder (standard)**
Utilizes a hydraulic cylinder to raise or provide down pressure for the top feed wheel (controlled via handle on either side of the infeed hopper)
- **Last Chance Cables (standard)**
Stops/reverses the feed wheel when pulled in case of an emergency
- **Operator Safety Control Bar (standard)**
Wraps around 3 sides of the infeed chute & controls the direction of feed wheels
- **Wood Pusher Paddle (standard)**
Used to feed small wood debris into the chipper
- **Chipper Hood Pin w/Padlock (standard)**
Prevents unauthorized access to the disc or drum
- **Chipper Hood Engine Disable Plug (standard)**
Prevents engine from being started without the hood pin in place
- **Hydraulic Bottom Bump Bar (option)**
Stops feed wheels via mechanical connection when bumped, diverting hydraulic power away from the feed wheels
