# MODEL BTC-300
## Track Carrier

**90” Forestry Mulcher**
**44” diameter Stump Grinder**

Combine industry leading power and class leading comfort with the BTC-300 Track Carrier by Bandit. Right-of-way maintenance workers and land clearing professionals can **quickly mow trees and brush** with the 90-inch wide forestry mulcher head or grind stumps with the 44” diameter stump grinder wheel. And the high flotation CAT 315L steel tracks provide **excellent stability** and traction over a variety of terrain.

## NEVER SACRFICE OPERATOR COMFORT

The ROPS/FOPS/OPS certified cab on the BTC-300 provides ample room and visibility giving operator’s high comfort while mulching or stump grinding. The air ride suspension seat with adjustable armrests accommodates operators of various sizes. Ballistic-grade polycarbonate glass ensures protection from debris that may accidently hit the window. Thermal insulation reduces outside noise keeping the inside of the cab quite while regulating air temperature. A heating and air conditioning system comes standard as well.

## POWERFUL TRACK UNDERCARRIAGE

A Caterpillar 315L steel track undercarriage with single or double grouser track pads are available. The wide track stance enhances turnability and with a travel speed of 3.3 MPH the unit can get to the worksite quickly and efficiently. The BTC-300 has two separate hydraulic systems (one for the attachments and one for the tracks) so if an issue arises with an attachment the track system will work.

## MAXIMIZE YOUR UPTIME

The BTC-300 is designed to be easier to work on with all common maintenance items easily accessible. The cab tilts to the side for easy access and serviceability. Each attachment uses quick coupler hydraulic lines so switching between attachments can be done in under 10 minutes.

## HIGHLY EFFICIENT

The hydraulic system on the BTC-300 is designed for maximum productivity during mulching or stump grinding. The mulcher head features holders with a raker regulating the cutting action ensuring a smooth, aggressive cutting action. The large diameter stump grinder attachment features a wide array of teeth and the proper cutter wheel RPM to power through stumps with ease.
