

# IMPAKTOR 250 EVO

## Slow-Speed Shredder

No other slow-speed shredder on the market can match the Impaktor 250 EVO in **versatility and performance** at this size and price point. Shred concrete, waste wood, C & D, hard plastic, and much more from a single machine! **Special shaft** geometry positions material to be crushed, then secondary double jaw breakers, in conjunction with the breaker bars, help operators achieve a **final product size**. In short – the 175 horsepower Impaktor 250 EVO is the most compact, most versatile slow-speed shredder available today.

### PRODUCE MORE

The Impaktor 250 EVO is designed from the ground up to really produce. It's able to do this by being easier to transport, quicker to set up, and tougher on a variety of material you need to shred. The large volume hopper means less prep work to feed material, and compact dimensions means its easier to tow and position, weighing only 15 tons.

### QUICK CHANGE CASSETTE

The quick-change cassette system simplifies the shaft changing process allowing for quick maintenance and switching between shafts for different applications.

### SHAFTS OPTIONS

The Impaktor 250 EVO can be outfitted with either standard Impaktor shafts or the special paddle shafts, depending on the application. And the switch is relatively quick, thanks to the unique quick change cassette shaft system.

| Fuel Tank:         | 80 Gallon                   | 303 L                         |

## Shredder Shafts

**Concrete Shafts** – recommend for shredding asphalt, C & D, and concrete.

**Electro Shafts** – recommended for shredding electrical waste and cable applications.

**Paddle Shafts** – recommended for shredding clean wood waste and tires.

**4-Piece Star Shafts** – recommended for shredding wood waste where the final end product does not need to be fine.

**6-Piece Star Shafts** – recommended for shredding wood waste where a finer end product is desired.

| MODEL        | IMPAKTOR 250 EVO |
|--------------|------------------|
| Concrete     | X                |
| Electro      |                  |
| Paddle       | X                |
| Star 4-piece |                  |
| Star 6-piece |                  |

## COMMITTED TO QUALITY & PRODUCTIVITY

Since 1983, Bandit has manufactured equipment for a multitude of wood waste processing markets. The vision since the beginning, is to build quality, highly productive, easy to maintain equipment providing years of dependable service.

The commitment for quality, innovation and dedication is instilled in every employee and is one of the main reasons why Bandit became an Employee-Owned Company (ESOP) in 2018. These core values ensure each Bandit machine will leave the factory ready to exceed your expectations.

## STEEL TRACK UNDERCARRIAGE

Track units feature a heavy-duty steel track undercarriage. Easy mobility on uneven or high surfaces.

## IMPAKTOR 250 EVO FEATURES

- **Hydraulic Motor**  
Hydrostatic drive with power regulated hydraulic motors
- **Quick Change Shafts**  
Quick change shaft system for simple service and maintenance
- **Remote Control**  
Remote control with emergency switch (extra spare remote provided)
- **Water Sprinkler**  
Reduces the amount of dust in the feeding area and on the discharge belt
- **2-Stage Crushing Process**  
2-stage crushing process with special shaft geometry, secondary double jaw breaker, and breaker bars
- **Drive & Adjustment**  
Asynchronous drive with alternating adjustment of the shaft speed for smooth pulling of heavy material
- **Short Setup Times**  
The Impaktor 250 EVO can be set up in as little as two minutes and ready to work!

WATCH IT RUN!

**Bandit Offers a Complete Line of Tree Care Equipment:**  
Hand-Fed Chippers • Stump Grinders • Whole Tree Chippers  
Horizontal Grinders • Slow-Speed Shredders
