

MODEL 2550 TRACK

Hydrostatic Stump Grinder

2550XP TRACK

Combining the maneuverability of a compact stump grinder with the excellent all-terrain capability of a track machine is the Bandit Model 2550 Track. Featuring a turf-friendly rubber track undercarriage, the Model 2550 Track has both low ground pressure and excellent flotation for crossing delicate yards. At 35 inches wide, the Model 2550 Track fits through standard yard gates, and it boasts a wide cutter swing. It's the perfect all-terrain stump grinder for tackling tough stumps in difficult-to-reach areas.

MACHINE MOUNTED CONTROL VALVES

CLASS-LEADING PERFORMANCE

The Model 2550 track features a 53 1/2" cutter head swing while grinding to a depth of 15" or a height of 13 1/2". An optional hydraulic grading blade aids with jobsite cleanup.

CUTTER WHEEL OPTIONS

Two different cutter wheel options are available. The Bandit wheel, with 18 Green teeth, provides an efficient cut while the concave teeth can be rotated up to three times before needing discarded. The New Revolution wheel, with 24 carbide hex teeth, also boasts an efficient cut and is popular for its ability to contain debris under the machine, reducing clean up.

BELTLESS HYDROSTATIC DRIVE

A heavy-duty Parker hydraulic drive motor is mounted on one side of the cutter wheel providing a simple, yet economical way to drive the cutter wheel. No drive belts, bearings, jack shafts or clutches are needed reducing maintenance costs and increasing productivity.

CHOOSE YOUR OWN CONTROLS

How do you prefer to grind? With the 2550 track, operators can ensure they will be most productive yet comfortable with having to select their desired controls -- valves mounted on the side of the machine or radio remote with tether back-up.
