

MODEL 2900 TRACK

Hydrostatic Stump Grinder

The Model 2900 Track is an extremely versatile machine and is designed mainly for **high production grinding** applications including lot clearing and large stump removal jobs. One of the reasons this unit is so popular is that it is also an excellent backyard stump grinder. Contractors specializing in large stump removals in tight locations use the 2900 Track because of its speed and maneuverability.

MANEUVERABLE AND POWERFUL

- CAT 120 or PSI 165 engine options
- Low-maintenance hydrostatic drive
- Optional hydraulic grading blade

TURF FRIENDLY

The track drives are independent, which allows for a higher maneuverability with a zero-turning radius. The turf-friendly rubber track undercarriage provides great flotation, allowing it to travel over lawns and golf courses without leaving much of a footprint. The rubber tracks will retract to 35" allowing the 2900 Track to fit through a standard 36" backyard gate, and expand out to 53" for added stability. The undercarriage utilizes four cylinders, allowing the tracks to stay parallel as they retract and expand, minimizing wear and increasing longevity.

RADIO REMOTE CONTROL

All track and grinding functions are controlled by a wireless radio remote with tether back-up making it easy to operate the unit in almost any position.
