

# MODEL 3100 TOWABLE

## Hydrostatic Stump Grinder

The Model 3100 Towable is a **high production, cost-effective stump grinder** ideally suited for municipalities, fleet use, and for operations grinding big stumps. It's the largest towable stump grinder offered by Bandit, and with up to 165 horsepower it's the **most powerful towable stump grinder** on the market. With a large 31" diameter belt-driven cutter wheel, strong hydraulic systems and a large frame, there simply isn't a more productive, more reliable towable stump grinder available.

### BIG GRINDING DIMENSIONS FOR BIG STUMPS

The Model 3100 has a wide 80" side-to-side cutter wheel swing to easily handle large stumps. It can grind to a depth of 27" and reach stumps 31" high. Combined with a 60" telescoping tongue, the Model 3100 often needs no repositioning once it's staged at a stump. This contributes to the Model 3100's impressive grinding speed – even the largest stumps are usually processed in a matter of minutes.

### MOST POWERFUL TOWABLE STUMP GRINDER

A variety of engine options are available, ranging from a Kohler 74 or Caterpillar 120 horsepower diesel engine or a 165 horsepower gas engine. These engines turn a 31" diameter cutter wheel available as a Bandit wheel with Greenteeth or a New Revolution wheel with hex teeth.

### COLORS AND OPTIONS TO MATCH YOUR FLEET

The Model 3100 is available with a variety of options to suit specific needs. Wireless radio remote control gives operators the freedom to grind stumps from any nearby location. Tool boxes, hitch designs and chip guards are available, as are a range of custom color options. Bandit will build your stump grinder to fit your job, and to match the rest of your fleet.
